

Team Miami: Ideation Project

Our two Major ideas

Phone
Charging
Battery
Glove

Health
Buddies

The Charging Glove: Wearing power on your sleeve... literally

Able to connect to most basic ports in order to charge device.

Offers touch screen Ui to control a timer, allowing for users to set how long they would like to keep the charger on to ensure minimal loss of battery life

Health Pets: Digital Pets to keep you healthy

Acts as a multi purpose health device, a pedometer, sleep monitor and even able to remind one to exercise.

Would be a small wearable circular device, with a touch screen, the main appeal being a digital pet feature along with the other aforementioned features.

The pets themselves will be based on real world animals, and they're health and livelihood will depend on the user developing healthy lifestyle habits.
