Philly

Philly

OUR VISION

Jose, David, Bennett, Dane, Ryan

Interactive Water Bottle

- Paired with app accessible on app store
- Bluetooth connection
- Records how much water you drink
- Temperature of water
- Flavored water options
- Metal-cylindrical shape
- Charging port

Communal Food Service

- Create a digital system for the pantry to show what is available for free (app/website)
  - Display to people the types of non perishable foods that are available
  - Display if the item is in stock or not
- Create a special type of bin where people can drop off non perishable items that they would donate
  - Would only accept non-perishable items that are boxed or in cans

DONATE

Philly

Communal Food Service

Digital Clam Shell

- Clamshell would display food options based on the users preferences, students would then be able to pick up their plate with the food they want rather than having to go and serve themselves
- Food service employees would then be displayed the options a person wants on their clam shell

Digital Trading Coins

- Collectible coins that you can plug into your phone that displays info about you
- Trade them with other people
- Monetary value- some coins are worth more than others
